In addition to our three remote sensing educational levels and certificates:

which are based on ERDAS IMAGINE® software, **Brilliant Remote Sensing Labs** is pleased to offer the following Remote Sensing and ERDAS IMAGINE® training courses and certification program:

Become a **Certified Trainer**	Become a **Certified Training Center**	Join the **University Program**	Join the **Organization Program**

Become a

Certified Remote Sensing Trainer
(Using ERDAS IMAGINE®)

BRS-Labs (**as a certified developing education partner for Hexagon Geospatial**) offers specialists and professionals from all the world the right to teach the Remote Sensing & ERDAS IMAGINE® curriculum created by BRS-Labs by themselves in their universities or organizations.

This can be made by offering them the required qualification level of our remote sensing courses, and achieving some preparations and testing procedures regarding their teaching skills. This will end up by offering them a Certified Trainer Certificate with the following three levels:

o **Certified Trainer for the Remote Sensing Specialist Certificate** (RSS™ Certified Trainer):
  o Costs $1000, in addition to the cost of the RSS certificate itself (available in the pricing page).
  o Required achieving all the RSS exams with a "Distinction" grade (with a score not less than 85%).

o **Certified Trainer for the Remote Sensing Professional Certificate** (RSP™ Certified Trainer):
  o Costs $600, in addition to the cost of the RSP certificate itself (available in the pricing page).
  o Required achieving all the RSP exams with a "Distinction" grade (with a score not less than 85%).

o **Certified Trainer for the Remote Sensing Solution Developer Certificate** (RSSD™ Certified Trainer):
  o Cost: $600, in addition to the cost of the RSSD certificate itself (available in the pricing page).
  o Required achieving all the RSSD exams with a "Distinction" grade (with a score not less than 85%).

For more details regarding the Certified Trainer Program, please contact:

info@remote-sensing-portal.com

Become a

Certified Remote Sensing Training Center

BRS-Labs offers private training centers, faculties and universities' departments the right to become a certified training centers.

These centers are authorized to teach the Remote Sensing & ERDAS IMAGINE® curriculum created by BRS-Labs inside their premises. Our curriculum is shown in our course list at:

https://remote-sensing-portal.com/courses/

o Cost: $4000, in addition to the cost of qualifying two certified trainers through BRS-Labs' Certified Trainer Program.

o Required checking the readiness of the training center and its facilities to offer our Remote Sensing curriculum in addition to the availability and readiness of the two certified trainers.

o The center can also become a "**Certified Examination Center**" which is authorized to set up exams at any date and time suitable to its local time zone. But, exams must be executed using our global online examination software. The "**Certified Examination Center**" costs additional $1000.

o The certificates will carry both logos of BRS-Labs and the Training center.

Join the

University Program

o The University Program is concerned with teaching **BRS-Labs'** Remote Sensing & Satellite Image Processing courses shown in our course list at (https://remote-sensing-portal.com/courses/) as a university curriculum (using ERDAS IMAGINE® software), or as an associated part to one of the current university taught subjects. In this case, the university pays a yearly subscription for a certain number of students (or alternatively, students pay by themselves), and benefit from **a 40% Educational discount** compared to the original commercial prices announced in our pricing page. Also, the university can benefit from the option of having "**a FREE Full Year Access**" (valued $900 per student for our 3 certificates RSS, RSP, and RSSD) to our online curriculum and training materials, instead of limiting the access to the course duration only. Additionally, students can reserve our online exams at any time in the year if they wish, and receive certificates from **BRS-Labs** (a certified developing education partner for Hexagon Geospatial).

o **Summary of Benefits:**
  ➢ **Benefits for Universities' Students:** Discounted prices for our online courses, free support, exams and certificates as described above + a FREE full year access.
  ➢ **Benefits for Academic Staff:** Becoming Certified Trainers, based on **BRS-Labs'** Certified Trainer Program, and having the same discounted students prices.
  ➢ **Benefits for Universities & its departments and training centers:**
    ▪ Becoming a Certified Training centers, which are authorized to teach **BRS-Labs'** curriculum using **Hexagon Geospatial's** software, according to our Certified Training Centers Program.
    ▪ Announcing them as an authorized training centers in **BRS-Labs** website & Social media.
    ▪ Possibility of adding their logo on our certificates as an organization teaching our curriculum to their students.

o **Pricing:**
  • The **RSS** certificate and its courses will cost $1140 per student per year, instead of $1900 per student per course duration.
  • The **RSP** certificate and its courses will cost $570 per student per year, instead of $950 per student per course duration.
  • The **RSSD** certificate and its courses will cost $420 per student per year, instead of $700 per student per course duration.
  • A minimum payment of 10 students per year is required to receive the university package.
  • If you don't have ERDAS IMAGINE® software, then let us know to discuss.
o Also, a university can benefit from any of the following programs with the additional prices mentioned in their links:
    ▪ The Certified Trainer Program.
    ▪ The Certified Training Center Program.
